

PARLIAMENT BUILDING VIENNA

Reference

Vienna, Austria

General:

Concept/Product: , ,

Building Type: Government building

Completion: 2019 - 2021

Description:

The capital of Austria, Vienna, is home to one of the country's most powerful structures: The parliament building from the 19th century comprises the seat of the two chambers of parliament, the National Council as well as the Federal Council of the Republic of Austria.

As part of the general renovation of the historic building complex on Vienna's Ringstrasse, Lindner GmbH was involved in the construction project with numerous products and services. In addition to the repair of damage to the building fabric, the main objective was the general modernization of the property within the framework of the preservation of historical monuments. The combination of Lindner's modern hollow floor system FLOOR and more® and the historic overlay therefore met all the requirements. In order to continue to preserve the classic look of the wall and ceiling surfaces, the entire building services were installed in the access floor - completely in line with the maxim of sustainability.

Completed Works:

Hollow floor systems

FLOOR and more® comfort

FLOOR and more®

HYDRO comfort

Plasterboard heated and chilled ceilings
