Reference

Plan-Les-Ouates, Switzerland

General:

Concept/Product: ,

Building Type: Office buildings, Research buildings/Laboratory

Architecture Burckhardt+Partner AG

Completion: 2020 - 2021

Description:

Novimmune SA has built its new headquarters in Plan-les-Ouates to drive the development of biospecific technologies. Under the brand name Light Chain Bioscience, the biochemical company develops multi-specific antibodies – and this requires a modern company building with innovative solutions and the highest quality.

For Novimmune's new headquarters, Lindner supplied and installed various wall systems, including Lindner Life Stereo, Lindner Logic Metal and Lindner Logic Timber, as well as a large number of door elements and sliding doors. The Lindner Logic Metal solid wall is particularly notable for its versatility, quick installation and individual design options. In addition, the partition contributes significantly to sound insulation within the building, creating a quiet working environment – ideal for research and development companies such as Novimmune.

Completed Works:

Glass partitions

Lindner Life Stereo 125

Partitions

Metal partition - Lindner Logic

Timber partition - Lindner Logic

Sliding doors

Light Chain Bioscience

Date of issue: 03.06.2024
