

GERBER - FACADE WORKS

Reference

Stuttgart, Germany

General:

Concept/Product: ,

Building Type: Multipurpose building, Residential buildings, Shopping centre, Office buildings

Client: Württembergische Lebensversicherung AG

Architecture: KBK Architekten GmbH Belz Lutz Guggenberger

Completion: 2014

Description:

The Gerber Quarter in Stuttgart once was a well-known leather tanning centre. These days are past, and with the erection of the GERBER shopping centre, shopping has filled the blank. The GERBER's 25,000 sqm of retail space are divided in 86 boutiques, diverse restaurants and grocery stores. Additionally, 16,000 sqm of high-quality office and residential spaces have been added to the GERBER complex.

The shopping centre is accessible through three entrances: the north and south portal and the historic corner house on Tübinger Straße. This venerable building from 1900 also influenced the design of all newly built facade constructions. In order to maintain its striking appearance, an extensive redevelopment endeavour was put into motion. The other parts of the GERBER complex were enveloped in a natural stone facade, implemented as a post and mullion construction and featuring Portuguese shell limestone. Another special feature of the GERBER are its five town houses, built on top of the complex and grouped around a roof courtyard. Lindner Fassaden GmbH was contracted with the construction of the complete building hall of the GERBER complex, also including the town houses' facades and the corner house redevelopment. Furthermore, Lindner was contracted with the complete interior fit-out of the building.

Completed Works:

Roof

- Rooftop outdoor grounds and vegetation
- Titanium zinc roofs and flat roofs

Rainscreen cladding

- Ventilated plaster base facade

Steel construction and locksmith works

- Banisters

Sun protection

Metal plate covering and attics
