

MAXWELL CENTRE, UNIVERSITY OF CAMBRIDGE

Reference

Cambridge, United Kingdom

General:

Concept/Product:

Building Type: Schools/Educational establishments

Client: University of Cambridge

Architecture: BDP Architects

Completion: 2015

Description:

The Maxwell Centre at the University of Cambridge is a centrepiece building created to pioneer revolutionary “blue skies” research and industrial partnership in the physical sciences. The building named after physicist James Clerk Maxwell will offer laboratory and meeting spaces for more than 230 people. Lindner installed a customised LMD-St expanded metal canopy ceiling with a bronze PPC finish.

Completed Works:

F0 Metal ceiling

LMD-St - Expanded Metal ceilings
