

**NO 5 ST PAUL'S SQUARE**

## Reference

### Liverpool, United Kingdom

---

#### General:

**Concept/Product:**

**Building Type:** Office buildings

**Client:** English Cities Funds

**Architecture:** RHWL Architects

**Completion:** 2006 - 2007

#### Description:

Lindner produced and installed all six different kinds of facade systems at this project. The whole installation of the facade has been achieved without any scaffolding by using a prefabricated and glazed unitized curtain wall system, consisting of structural-glazing-systems, facade elements with special aluminium profiles and exterior sunblinds. Due to the custom-made design the facade is especially appealing under architectural aspects.

#### Completed Works:

**Rainscreen cladding**

**Curtain wall**

Unitised facade

Stick system

Structural glazing facade
