

# UNIVERSITY AND REGIONAL LIBRARY DARMSTADT

## Reference

**Darmstadt, Germany**

---

### General:

**Concept/Product:**

**Building Type:** Library

**Client:** Technische Universität Darmstadt

**Architecture:** Architekten Bär Stadelmann Stöcker

**Completion:** 2011 - 2012

### Description:

The new library building arose in the center of the "Campus Stadtmittel" and merges various university libraries. A total area of 20.000 square metres provides 700 picking tables and workspaces. 78 kilometers of shelves supply space for a total of 2,4 million media. These special conditions require high-load bearing capacities of the floor - in some areas there are also intelligent heating and cooling systems integrated in the floor cavity which regulate the room climate to optimal values.

### Completed Works:

**Hollow floor systems**
